**The Wired Society** - James Martin 1978

**Monstrous Opera** - Charles Dill 2014-07-14

One of the foremost composers of the French Baroque operatic tradition, Rameau is often cited for his struggle to steer lyric tragedy away from its strict Lullian form, inspired by spoken tragedy, and toward a more expressive musical style. In this fresh exploration of Rameau's compositional aesthetic, Charles Dill depicts a much more complicated figure: one obsessed with tradition, music theory, his own creative instincts, and the public's expectations of his music. Dill examines the ways Rameau mediated among these

often competing values and how he interacted with his critics and with the public. The result is a sophisticated rethinking of Rameau as a musical innovator. In his compositions, Rameau tried to highlight music's potential for dramatic meanings. But his listeners, who understood lyric tragedy to be a poetic rather than musical genre, were generally frustrated by these attempts. In fact, some described Rameau's music as monstrous--using an image of deformity to represent the failure of reason and communication. Dill shows how Rameau answered his critics with rational, theoretical arguments about the role of music in lyric tragedy. At the same time, however, the composer sought to placate his audiences by substantially revising his musical texts in later performances, sometimes abandoning his most creative ideas. Monstrous Opera illuminates the complexity of Rameau's vision, revealing not only the tensions within the music but also the conflicting desires that drove the man--himself caricatured by his contemporaries as a monster. *Military Interference With the Election in Delaware, November 4, 1862* - Christopher Slavens 2020-11-27  
Originally published by order of the Delaware General Assembly in 1863, *Military Interference With the Election in Delaware, November 4, 1862* contains testimonies from nearly one hundred and thirty citizens about Republicans' use of federal troops to disarm volunteer militia companies and harass, assault, arrest, imprison, and disenfranchise Democratic voters. There are also dissenting voices who maintain that Southern-sympathizing Democrats planned to suppress the Republican or Union vote, and had to be restrained by force. The joint committee appointed by the General Assembly to investigate the controversy concluded that Republican politicians orchestrated a military invasion of Delaware "to defeat the fair expression of the popular will at the polls by the potent influence of Federal bayonets." The first edition of the committee's report and journal was never reprinted, and is one of the rarest books about Delaware history. This new edition, transcribed and edited by Christopher Slavens, will enable readers to read the hundreds of pages of testimonies about the events of 1862 for themselves, and make up their own minds about what happened, and why.

**Application of a Fiber Optic Distributed Strain Sensor System to Woven E-Glass Composite -**

National Aeronautics and Space Administration (NASA) 2018-06-19

A distributed strain sensing system utilizing a series of identically written Bragg gratings along an optical fiber is examined for potential application to Composite Armored Vehicle health monitoring. A vacuum assisted resin transfer molding process was used to fabricate a woven fabric E-glass/composite panel with an embedded fiber optic strain sensor. Test samples machined from the panel were mechanically tested in 4-point bending. Experimental results are presented that show the mechanical strain from foil strain gages comparing well to optical strain from the embedded sensors. Also, it was found that the distributed strain along the sample length was consistent with the loading configuration.
