**Why** - Samantha Kleinberg 2015-11-16

Can drinking coffee help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, *Why* will help you sharpen your causal inference skills.

Muslim-Christian Relations in Central Asia - Christian van Gorder 2008-06-05

This book explores issues of cultural tension that affect Muslim and Christian interaction within the Central Asian context. It looks at the ways that Christians have interacted with Central Asian Muslims in the past, and discusses what might need to be done to improve Muslim-Christian relations in the region in the present and future. Since the time that Nestorian Christian missionaries traveled eastward from Asia Minor along the Silk Road, and Islamic cultures came to the region in the 7th century, Christians and Muslims have shared a unique relationship in a fascinating cultural milieu. Under the reigns of various conquerors, Czars, Soviets and modern nationalist strong-men, the ever changing political and economic situation of these former Soviet Republics has dramatically affected the ways that Muslims and Christians have practiced their faith. Today, as Muslims and Christians work to stabilize their interactions, they face new challenges because of the activities of Protestant Christian and Islamist missionaries who are flooding into Central Asia as never before. The book corrects common misunderstandings of Central Asia as a cultural backwater, and is a valuable introduction to Muslim and Christian interactions in one of the most quickly changing regions of the globe. It will appeal to readers

interested in Muslim-Christian interaction, and for researchers in the field of World Religions, Central Asian Studies and Intercultural Studies.

*1914: Fight the Good Fight* - Allan Mallinson 2013-09-02

'No part of the Great War compares in interest with its opening', wrote Churchill. 'The measured, silent drawing together of gigantic forces, the uncertainty of their movements and positions, the number of unknown and unknowable facts made the first collision a drama never surpassed...in fact the War was decided in the first twenty days of fighting, and all that happened afterwards consisted in battles which, however formidable and devastating, were but desperate and vain appeals against the decision of fate.' On of Britain's foremost military historians and defence experts tackles the origins - and the opening first few weeks of fighting - of what would become known as 'the war to end all wars'. Intensely researched and convincingly argued, Allan Mallinson explores and explains the grand strategic shift that occurred in the century before the war, the British Army's regeneration after its drubbings in its fight against the Boer in South Africa, its almost calamitous experience of the first twenty days' fighting in Flanders to the point at which the British Expeditionary Force - the 'Old Contemptibles' - took up the spade in the middle of September 1914: for it was then that the war changed from one of rapid and brutal movement into the more familiar vision of trench warfare on Western Front. In this vivid, compelling new history, Mallinson brings his experience as a professional soldier to bear on the circumstances, events, actions and individuals and speculates - tantalizingly - on what might have been...

Fretting about these on sites, different countries adopt different measures on sites. This book firstly sketches the construction accidents on sites, followed by a review on safety measures in some of the developing countries such as Bermuda, Egypt, Kuwait and China; as well as developed countries, for example, the United States, France and Singapore.
