Hunger Notes - 1994

United States Code Service, Lawyers Edition - United States 1936

Pension Plan Guide, Transfer Binder - 1991

Artificial intelligence - When do machines take over? - Klaus Mainzer 2019-10-14

Everybody knows them. Smartphones that talk to us, wristwatches that record our health data, workflows that organize themselves automatically, cars, airplanes and drones that control themselves, traffic and energy systems with autonomous logistics or robots that explore distant planets are technical examples of a networked world of intelligent systems. Machine learning is dramatically changing our civilization. We rely more and more on efficient algorithms, because otherwise we will not be able to cope with the complexity of our civilizing infrastructure. But how secure are AI algorithms? This challenge is taken up in the 2nd edition: Complex neural networks are fed and trained with huge amounts of data (big data). The number of necessary parameters explodes exponentially. Nobody knows exactly what is going on in these "black boxes". In machine learning we need more explainability and accountability of causes and effects in order to be able to decide ethical and legal questions of responsibility (e.g. in autonomous driving or medicine)! Besides causal learning, we also analyze procedures of tests and verification to get certified AI-programs. Since its inception, AI research has been associated with great visions of the future of mankind. It is already a key technology that will decide the global competition of social systems. "Artificial Intelligence and Responsibility" is another central supplement to the 2nd edition: How should we secure our individual liberty rights in the AI world? This book is a plea for technology design: AI must prove itself as a service in society.

U.S. History - P. Scott Corbett 2017-12-19

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The

authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Airline Deregulation and Laissez-Faire Mythology - Paul S Dempsey 1992-09-08

Airline deregulation is a failure, conclude Professors Dempsey and Goetz. They assault the conventional wisdom in this provocative book, finding that the Airline Deregulation Act of 1978, championed by a profound political movement which also advocated the deregulation of the bus, trucking, rail, and pipeline industries, failed to achieve the promises of its proponents. Only now is the full impact of deregulation being felt. Airline deregulation has resulted in unprecedented industry concentration, miserable service, a deterioration in labor-management relations, a narrower margin of safety, and higher prices for the consumer. This comprehensive book begins by exploring the strategy, tactics, and egos of the major airline robber barons, including Frank Lorenzo and Carl Icahn. In separate chapters, the strengths, weaknesses, and corporate cultures of each of the major airlines are evaluated. Part Two assesses the political, economic, and social justifications for New Deal regulation of aviation, and its deregulation in the late 1970s. Part Three then addresses the major consequences of deregulation in chapters on concentration, pricing, service, and safety, and Part Four advances a legislative agenda for solving the problems that have emerged. Professors Dempsey and Goetz advocate a middle course of responsible government supervision between the dead hand of regulation of the 1930s and the contemporary evil of market Darwinism. The book will be of particular interest to airline and airport industry executives, government officials, and students and scholars in public policy, economics, business, political science, and transportation.

Guide to Technical, Trade, & Business Schools 2001/2003 - Mary Goodhue Lynch 2001-10

Head Start Program Performance Standards - United States. Office of Child Development 1975

History of Modern Soy Protein Ingredients - Isolates, Concentrates, and Textured Soy Protein Products (1911-2016) - William Shurtleff; Akiko Aoyagi 2016-01-17
