The chapters in How to Build a Motorcycle will tell you how to complete a huge variety of tasks that will allow even the greenest of novices to get their hands dirty and start modifying with purpose. If you belong to this camp, start with some of the low-input, high-reward jobs, such as fitting bars, swapping the rear shocks or wiring in a new tail light. Lois on the Loose - Lois Pryce 2009-07-28

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

Capital Ideas - Jeffrey M. Chwieroth 2009-12-14

The right of governments to employ capital controls has always been the official orthodoxy of the International Monetary Fund, and the organization's formal rules providing this right have not changed significantly since the IMF was founded in 1945. But informally, among the staff inside the IMF, these controls became heresy in the 1980s and 1990s, prompting critics to accuse the IMF of indiscriminately encouraging the liberalization of controls and precipitating a wave of financial crises in emerging markets in the late 1990s. In *Capital Ideas*, Jeffrey Chwieroth explores the inner workings of the IMF to understand how its staff's thinking about capital controls changed so radically. In doing so, he also provides an important case study of how international organizations work and evolve. Drawing on original survey and archival research, extensive interviews, and scholarship from economics, politics, and sociology, Chwieroth traces the evolution of the IMF's approach to capital controls from the 1940s through spring 2009 and the first stages of the subprime credit crisis. He shows that IMF staff vigorously debated the legitimacy of capital controls and that these internal debates eventually changed the organization's behavior--despite the lack of major rule changes. He also shows that the IMF exercised a significant amount of autonomy despite the influence of member states. Normative and behavioral changes in international organizations, Chwieroth concludes, are driven not just by new rules but also by the evolving makeup, beliefs, debates, and strategic agency of their staffs.

Our Ridiculous World (Trip) - Reece Gilkes 2020-08-04

This fast-paced, often-humorous travel book tells the truly ridiculous story of how two British friends, Matt Bishop and Reece Gilkes, became the first people to circumnavigate the globe on a scooter with a sidecar. Their world-record-breaking 34,000-mile-long journey took them through thirty-five countries and across five continents. With no experience of mechanics, overlanding, or even riding motorbikes, the pair took their Honda scooter and barn-built sidecar through some of the world's toughest environments, including a scorching Sahara Desert and the frozen wilds of a Siberian winter. This heartwarming story will restore your faith in humanity as strangers all over the world save the pair from the life-threatening and downright idiotic situations in which they find themselves. At the same time, the book lifts the curtain on the issue of modern slavery, which still plagues every country on earth. Matt and Reece meet survivors of modern slavery and organisations fighting it all over the world, and the hard-hitting stories they share will leave you questioning your role in the issue and asking how you can help. "Reading this refreshing book is easy-time just slips by-but that's the only easy thing about the whole affair. So my advice is: Think of something you'd love to do that's really quite ridiculously impossible. Then read the book. Then go and do it. I must say, it really takes me back . . ." - Ted Simon, author of *Jupiter's Travels* "The many threads of this gripping adventure unfold as a powerful, at times opinionated, heart-tweaking, fast-flowing journey of surprises.

Woven into the stories are top tips, quirky facts about the lands traversed, and a wonderfully self-deprecating sense of humour. This story is proof that a positive attitude, determination, respect towards others, and wide-open minds can change the world. Adventurists are going to love the challenges and, at times, readers are going to have to put this book down so they can really think about the images attached to the words they have just read." - Sam Manicom, author of *Into Africa*. "A powerfully-written tale about travelling with purpose. But what a daft machine to use!" - Paddy Tyson, *Overland Magazine* You can also get a signed copy of this book with colour pictures at www.armchairadventurefestival.com/shop.
