Seventh Grade vs. the Galaxy - Joshua S. Levy
2019-03-05

Percy Jackson meets Star Trek PSS 118 is just your typical school—except that it's a rickety old spaceship orbiting Ganymede, a moon of Jupiter. Jack's dad used to be the science teacher, until he got fired for tinkering with the ship. Now Jack just wants to get through the last day of school without anything else going wrong. But when

the school is mysteriously attacked, Jack discovers that his dad has built humanity's first light-speed engine—and given Jack control of it. To save the ship, Jack catapults it hundreds of light-years away . . . and right into the clutches of the first aliens humans have ever seen. School hasn't just gotten out: it's gone clear across the galaxy. And now it's up to Jack and his friends to get everyone home. "[T]his middle-grade action-

adventure space opera is just plain fun."—Booklist "A perfect bridge for readers looking for a Percy Jackson-esque work of science fiction."—School Library Journal

The Meaning of International Experience for Schools - Angene Hopkins Wilson 1993
Angene Hopkins Wilson presents case studies which illustrate how internationally experienced persons—including teachers who have travelled and lived abroad, returned Peace Corps volunteer teachers, and immigrant and international students--contribute to the curriculum in their schools. In an affluent suburban elementary school, an impoverished rural middle school, and an inner-city magnet high school program, Wilson examines how school systems, teacher education programs, and communities can cooperate in efforts to

provide social education with a global perspective. She discusses problems such as the ambivalence of school culture towards international experience and the tension between cultural loyalty and world citizenship, offers a model explaining the impact of international experience and makes specific suggestions for using international experience more fully in the schools.

Weinstein 2016

Achieving College Dreams: How a University-Charter District Partnership Created an Early College High School tells the story of a remarkable 10-year collaboration between the University of California, Berkeley and Aspire Public Schools to develop and nurture the

California College Preparatory Academy. Bridging the two cultures--artfully described as "Pac-Man (the charter district) meets chess (the university)"--the school serves as an exemplar in providing low-income and first-generation college youth with an excellent and equitable education. Framed by a longitudinal lens, findings from community-engaged scholarship, and a diversity of voices from students to superintendents, this book charts the journey from the initial decision to open a school to the high school graduation of its first two classes. The book captures struggle, improvement, and success as it takes readers inside the workings of the partnership, the development of the school, and the spillover of effects across district and university. Confronting the challenge of interweaving rigor and support, its authors explore such critical ingredients as teacher-student advisories; school transition; the home-school divide; building a supportive college-preparatory culture; teaching with depth,

relational power, and equity; the forging of an academic identity; and scaling up. At a time of sharply unequal schools, glaring disparities in college readiness, and heightened expectations, *Achieving College Dreams* uniquely extends the knowledge base about how to better prepare underserved students for college eligibility and success. The book also calls for universities to step up to the plate as partners with districts to ensure both excellence and equity in secondary education for all children.

Partnership and Powerful Teacher Education - Tom Del Prete 2019-07-15

This collaborative volume offers an in-depth portrait and valuable reference for the development of clinical or school-embedded partnerships in teacher preparation by drawing on the decades-long partnership between a university and set of schools in an urban neighborhood. In the midst of a national movement towards partnership-based clinical teacher education, this book explains and illustrates the roles, commitments, and

collaborative practices that have evolved.

Divided into three parts, contributors outline the theory and practice of the clinical teacher preparation model and its neighborhood focus, covering topics such as: The social and institutional context of partnership development and teacher education; Key collaborative and learning practices; Challenges and questions that have emerged, and what can be learned from the experience. Written with voices of university faculty, school educators, program graduates, and students from partner schools, Thomas Del Prete offers a volume perfect for those looking to be inspired by an example of clinical teacher education and partnership in an urban community and to learn what can be achieved with conviction and perseverance over time.

A Dramatic Tale of Grizzlies and Gold Fourteen-year-old Cloyd Atcitty has been skipping school for years. He's run away from a group home for Native American boys, and is now being sent to work for Walter Landis, an old rancher on an isolated Colorado farm. In a cave above the

ranch, Cloyd finds a turquoise carving of a bear. Knowing that his people, the Utes, have a special relationship with bears, he keeps the small stone, hoping it will bring him strength. A terrible blow-up with Walter ends in near disaster, but the old man offers Cloyd one last

chance: they'll ride together into the mountains to reopen Walter's abandoned gold mine. Among the high peaks that harbor Colorado's last grizzlies, Cloyd's courage and loyalty will be tested to the limit.
