[Pick the Best and Leave the Rest](#) - Tarun Engineer 2020-10

You have the ability, experience and behavioural finesse. But even then, you are not able to succeed. Why is that so? Whereas some people are less educated but earn millions. They achieve big success even after doing less hard work. They are not good in behavioural terms but they join the ranks of influential people. Have you ever thought about it? If you have not, we can tell you the secret behind this. Because this difference is of the brain and brain is the power that recognizes the power hidden in thoughts. Then, you can win any big battle. Anil Ambani once said, "There is no alternative of brain power. Due to this power, you are able to control your chaotic life. Because when you start using it properly, your memory and vision increase." Tarun Engineer has written many Superhit books for the Diamond Books, Raja Pocket Books, Berrykerry Books & Ramesh Publishing House. 'Pick the Best and Leave the Rest' is his best creation in the category so far. Mr. Engineer has worked hard to collect ideas and thoughts from numerous resources. This is a result of his unflinching dedication to the realm of book writing. He would do many more prestigious projects like this one in the future too. Before reading this book, you must learn what the objective behind reading this book really is. Is it polishing career, or is it for developing your business? Is it for making your future secure, or is it for bringing

prosperity in the family? Is it for setting up an industry, or is it for getting back lost love? When you take the decision about this, these thoughts would start doing miracles.

The Origin of Competitive Strength - Akira Kawahara 2012-12-06

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."
