Case Studies on Diversity and Social Justice Education - Paul C. Gorski 2013-11-07

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. Each case, written in an engaging, narrative style, presents a complex but common classroom scenario in which an inequity or injustice is in play. These cases allow educators to practice the

process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and all content areas, allowing significant flexibility in how and with whom they are used.

Although organized topically, the intersection of these issues are stressed throughout the cases, reflecting the multi-faceted way they play out in real life. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called points for consideration. This unique feature provides valuable insight for understanding the complexities of each case.

The Beauty in Breaking - Michele Harper 2021-06-29
A NEW YORK TIMES BESTSELLER A New York Times Notable Book "Riveting, heartbreaking, sometimes difficult, always inspiring." —The New York Times Book Review "An incredibly moving memoir about what it means to be a doctor." —Ellen Pompeo
As seen/heard on Fresh Air, The Daily Show with Trevor Noah, NBC Nightly News, MSNBC, Weekend Edition, and more An emergency room

physician explores how a life of service to others taught her how to heal herself. Michele Harper is a female, African American emergency room physician in a profession that is overwhelmingly male and white. Brought up in Washington, D.C., in a complicated family, she went to Harvard, where she met her husband. They stayed together through medical school until two months before she was scheduled to join the staff of a hospital in central Philadelphia, when he told her he couldn't move with her. Her marriage at an end, Harper began her new life in a new city, in a new job, as a newly single woman. In the ensuing years, as Harper learned to become an effective ER physician, bringing insight and empathy to every patient encounter, she came to understand that each of us is broken—physically, emotionally, psychically. How we recognize those breaks, how we try to mend them, and where we go from there are all crucial parts of the healing process. The Beauty in

Breaking is the poignant true story of Harper's journey toward self-healing. Each of the patients Harper writes about taught her something important about recuperation and recovery. How to let go of fear even when the future is murky: How to tell the truth when it's simpler to overlook it. How to understand that compassion isn't the same as justice. As she shines a light on the systemic disenfranchisement of the patients she treats as they struggle to maintain their health and dignity, Harper comes to understand the importance of allowing ourselves to make peace with the past as we draw support from the present. In this hopeful, moving, and beautiful book, she passes along the precious, necessary lessons that she has learned as a daughter, a woman, and a physician.

Continuous Ambulatory Peritoneal Dialysis - G.R. Catto
2012-12-06

For more than a generation haemodialysis has been the

principal method of treating patients with both acute and chronic renal failure. Initially, developments and improvements in the system were highly technical and relevant to only a relatively small number of specialists in nephrology. More recently, as advances in therapy have demonstrated the value of haemofiltration in the intensive therapy unit and haemoperfusion for certain types of poisoning, the basic principles of haemodialysis have been perceived as important in many areas of clinical practice. In this volume, the potential advantages of bicarbonate haemodialysis are objectively assessed, the technical and clinical aspects of both haemofiltration and haemoperfusion discussed and the continuing problems associated with such extracorporeal circuits analysed. All the chapters have been written by recognized experts in their field. The increasing availability of highly technical facilities for appropriately

selected patients should ensure that the information contained in the book is relevant not only to nephrologists but to all practising clinicians. ABOUT THE EDITOR Dr Graeme R. D. Catto is Professor in Medicine and Therapeutics at the University of Aberdeen and Honorary Consultant Physician/Nephrologist to the Grampian Health Board. His current interest in transplant immunology was stimulated as a Harkness Fellow at Harvard Medical School and the Peter Bent Brighton Hospital, Boston, USA. He is a member of many medical societies including the Association of Physicians of Great Britain and Ireland, the Renal Association and the Transplantation Society.

Handbook of Healthcare System Scheduling -

Randolph Hall 2011-11-25

This edited volume captures and communicates the best thinking on how to improve healthcare by improving the delivery of services -- providing care when and where it is needed most -- through

application of state-of-the-art scheduling systems. Over 12 chapters, the authors cover aspects of setting appointments, allocating healthcare resources, and planning to ensure that capacity matches needs for care. A central theme of the book is increasing healthcare efficiency so that both the cost of care is reduced and more patients have access to care. This can be accomplished through reduction of idle time, lessening the time needed to provide services and matching resources to the needs where they can have the greatest possible impact on health. Within their chapters, authors address: (1) Use of scheduling to improve healthcare efficiency. (2) Objectives, constraints and mathematical formulations. (3) Key methods and techniques for creating schedules. (4) Recent developments that improve the available problem solving methods. (5) Actual applications, demonstrating how the methods can be used. (6) Future directions in which

the field of research is heading. Collectively, the chapters provide a comprehensive state-of-the-art review of models and methods for scheduling the delivery of patient care for all parts of the healthcare system. Chapter topics include setting appointments for ambulatory care and outpatient procedures, surgical scheduling, nurse scheduling, bed management and allocation, medical supply logistics and routing and scheduling for home healthcare.
