Fashioning Models - Joanne Entwistle 2013-07-18

The fashion model's hold on popular consciousness is undeniable. How did models emerge as such powerful icons in modern consumer culture? This volume brings together cutting-edge articles on fashion models, examining modelling through race, class and gender, as well as its structure as an aesthetic marketplace within the global fashion economy. Essays include treatments of the history of fashion modelling, exploring how concerns about racial purity and the idealization of light skinned black women shaped the practice of modelling in its early years. Other essays examine how models have come to define femininity through consumer culture. While modelling's global nature is addressed throughout, chapters deal specifically with model markets in Australia and Tokyo, where nationalist concerns colour what is considered a pretty face. It also considers how models glamorize consumption through everyday activities, and neoliberal labour forms via reality TV. With commentaries from industry professionals who experienced the cultural juggernaut of the supermodels, the final essay situates their impact within the rise of brand culture and the globalization of fashion markets since 1990. Accessible and highly engaging, *Fashioning Models* is essential reading for students and scholars of fashion and related disciplines.

Sexuality, Gender and Identity - Doug Risner 2018-10-24

Sexuality is a difficult topic for all educators. Dance teachers and educators are not immune to these educational challenges, especially given the large number of children, adolescents, and young adults who pursue dance study and performance. Most troubling is the lack of serious discourse in dance education and the development of educative strategies to promote healthy sexuality and empowered gender identities in proactive ways. This volume, focused on sexuality, gender, and identity in dance education, expands this developing area of study and investigates diverse perspectives from public schools, private sector dance studios and schools, as well as college and university dance

programs. By openly bringing issues of sexuality and gender to the forefront of dance education and training, this book straightforwardly addresses critical challenges for engaged educators interested in age appropriate content, theme and costume; the hyper-sexualization of children and adolescents; sexual orientation and homophobia; the hidden curriculum of sexuality and gender; sexual identity; the impact of contemporary culture; and mass media, and sexual exploitation. The original research provides a frank discussion, highlighting practical applications and offering insights and recommendations for today's educational environment in dance. This book was originally published as a special issue of the *Journal of Dance Education*.

The Crazy Busy Cure - Zena Everett 2021-11-16

How we spend our time is one of the greatest indicators of how successful we will be. We achieve our goals when we ruthlessly prioritise tasks and people that are important to us. If we focus our time, energy and attention on the wrong things we will never achieve the success or happiness that we aspire to. The problem is that these wrong things, the low value, low impact tasks that distract us from our priorities, are hard to ignore. They scream out at us all day: digital distractions, other people's urgent demand for 'five minutes' that's never five minutes, the meetings that you shouldn't be in, the pointless email chains, the reports you write that don't get read. We get a dopamine hit from ticking these tasks off a list. It's got us hooked on crazy busyness. But all we are doing is scratching off a layer of fake work on top of the real, valuable work. *The Crazy Busy Cure* is full of intensely practical tips to save people from this addiction and instead become productive again. Jammed with practical productivity solutions to use immediately, the book introduces concepts such as being like lions and chasing antelopes not field mice; Lawn Mower Managers who clear the path not clog it; the PIMP process for prioritisation and the Head Space model for understanding where your time goes. In this lively read, executive coach and organisational psychologist Zena Everett draws from her many thousands of hours and coaching and speaking to people and organisations about productivity blockers and how to shift them. She advises how to manage other people's work as well as your own and explains how these practices apply to virtual working, including chapters on staying energised and productive when working remotely and influencing on Zoom. The chapter on neurodiversity also offers productivity hacks for people with learning and thinking differences like dyspraxia and attention deficit disorder. Read this book and regain your productivity.

Hermes on Two Wheels - Kevin Wehr 2009-09-28

fulfillment.

Diamonds are Forever, Computers are Not - Shane M. Greenstein 2004
This is a collection of 42 essays about the economics and management of information technology markets. The first part of the book focuses on events, notable birth dates and longstanding trends. The unifying theme revolves around the role of human economic behavior in the face of uncertainty and confusion. The contributors' intent is to explain, educate and entertain -- to go beyond the obvious. The next part contains writing about the Internet. It discusses the development of the online commercial world, and analyzes the macroeconomic side of the investment boom and bust related to Internet activities. It also focuses on the measurement of economic activity in the digital economy. In addition, the book deals with how computers get used in organizations and discusses the Microsoft antitrust case. Finally, there are two long essays about economic constraints on strategic behavior in markets where standards and platforms matter.

It's a Setup - Timothy Black 2020-11-20

The expectation for fathers to be more involved with parenting their children and pitching in at home are higher than ever, yet broad social, political, and economic changes have made it more difficult for low-income men to be fathers. In *It's a Setup*, Timothy Black and Sky Keyes ground a moving and intimate narrative in the political and economic circumstances that shape the lives of low-income fathers. Based on 138 life history interviews, they expose the contradiction that while the norms and expectations of father involvement have changed rapidly within a generation, labor force and state support for fathering on the margins has deteriorated. Tracking these life histories, they move us through the lived experiences of job precarity, welfare cuts, punitive child support courts, public housing neglect, and the criminalization of poverty to demonstrate that without transformative systemic change, individual determination is not enough. Fathers on the social and economic margins are setup to fail.

Working Girls - Patricia Tilburg 2019-11-05

As the twentieth century dawned and France entered an era of extraordinary labor activism and industrial competition, an insistently romantic vision of the Parisian garment worker was deployed by politicians, reformers, and artists to manage anxieties about economic and social change. Nostalgia about a certain kind of France was written onto the bodies of the capital's couture workers throughout French pop culture from the 1880s to the 1930s. And the *midinettes*—as these women were called—were written onto the geography of Paris itself, by way of festivals, monuments, historic preservation, and guide books. The idealized working Parisienne stood in for, at once, the superiority of French taste and craft, and the political (and sexual) subordination of French women and labour. But she was also the public face of more than 80,000 real working women whose demands for better labour conditions were inflected, distorted, and, in some cases, amplified by this ubiquitous Romantic type in the decades straddling World War I. *Working Girls* bridges cultural histories of the Parisian imaginary and histories of French labour, and puts them in raucous dialogue with one another: a letter by a nineteen-year-old seamstress, a speech by a government

minister; a frothy Parisian guide by a bon vivant, the minutes of a union meeting; a bawdy café-concert song, a policy brief on garment working conditions.

Managing with Humor - Nilupama Wijewardena 2019-01-01

This book focuses on an emerging area of study in management: managerial humor and its impact on employees' outcomes. Drawing from theoretical work that advocates humor as a managerial tool and building on existing theory and documented evidence on humor, the book explores how managers can use humor to positively affect employees' short-term emotional states and long-term psychological resources at work, and thus reduce the likelihood of their leaving the organization. First, the book develops a theoretical framework for humor events at work and provides evidence-based findings on employees' humor behavior within actual work contexts. Second, it explores how humor can be used to positively impact employees' emotional states at work. In doing so, the book takes a multidisciplinary approach to humor by integrating theory and findings from the emotions literature, Positive Organizational Behavior, and Broaden and Build Theory into the humor literature. The book sheds new light on the consequences of managers' use of humor for employees. It provides practical guidelines on how managers can use humor as an effective tool at work to bring about desired employee outcomes.

The Journal of Electrical Workers and Operators - 1926

The Daily Grind - Marquita R. Walker 2014-10-27

The Daily Grind: How Workers Navigate the Employment Relationship introduces students to the tensions between labor and management within the U.S. employment relationship and explores how workers, operating in a socially and culturally structured system of capitalism, are influenced and manipulated by economic institutions and polity which exploit, devalue, and dehumanize workers in the name of corporate profit. The text covers how the American work ethic of the early nineteenth century helped shape the current perspective on the labor-management relationship, and how, over time, the Protestant and patriarchal influences of that period have countered the collective actions of workers in profound ways. The text further explores the effect of societal, cultural, and economic structures, both global and local, which limit workers' ability to achieve the "American Dream" and result in depressed economic conditions and discouraged workers. The text's focus on the current economic inequality and lack of social mobility challenges the current neoliberal ideology that capitalism is the best economic system. The overarching framework for The Daily Grind: How

Workers Navigate the Employment Relationship is situated in Labor Process Theory (LPT) which explores the control and resistance dichotomy between labor and management, the systematic deskilling of the workforce in order to increase production and increase owners' profits, and examines conflict over control of the labor process. An extension of Marxist theory about the organization of work, LPT explores the employment relationship, the control of work, the payment of work, the skills necessary for work, and the facilitation of work.

Looking Ahead - Raymond S. Nickerson 2021-12-17

This volume aims to review some of the recent developments and trends that seem especially relevant to any attempt to understand near-term-future possibilities; to consider what a variety of knowledgeable people are saying about changes and developments that could occur; and to relate the possibilities to needs and opportunities for human factors research. Human factors, in this case, includes not only the implications of human capabilities and limitations for the design of equipment and machines intended for human use, but also applied psychology in a more general sense. In particular, it is taken to involve social systems as well as physical ones, the interaction of people with the environment as well as with machines, the facilitation of communication between people as well as between people and computers, and the design of policies and procedures as well as the design of equipment. The author's intention is to focus on anticipated problems -- including opportunities as well as difficulties -- and ask how human factors research might contribute to solutions. It is assumed that there are ways in which such research could be useful in addressing societal problems that the profession has not yet realized and that these are more likely to be recognized in the future if the community is actively seeking to identify them.
