Thursday, December 3rd at 6:30 PM

FuGaKyū Japanese Cuisine
1280 Beacon St, Brookline, MA 02446

RSVP: by Friday, November 27

helen.dam@caremore.com or (562) 741.4420

The CareMore Health System is a nationally leading delivery system with operations in eight states (California, Nevada, Arizona, Tennessee, Georgia, Virginia, Ohio and Iowa). Our system is focused on the care of frail elders and other vulnerable populations (e.g., Medicaid and dual-eligibles). In most of the markets we serve, we are both payer and provider. This arrangement enables us to continuously pursue thoughtful innovation of our clinical model.

"Perhaps the most significant aspect of CareMore's philosophy is a persistent willingness to thoughtfully challenge the status quo."

*— Sachin H. Jain, MD, MBA, Chief Medical Officer, CareMore
Consulting Prof. of Medicine, Stanford University School of Medicine*

CareMore has developed highly specialized disease management programs for at-risk patients. Our programs include the thoughtful integration of clinical technology to augment patient care, and the use of Extensivist physicians who follow patients throughout the acute episode of care. Leading teams of nurse practitioners and other clinicians, CareMore physicians utilize a collaborative approach to deliver a truly multi-disciplinary and integrated form of care to our patients. In addition to their clinical leadership, our physicians continuously work to redesign and refine our model of care delivery.

THE CAREMORE EXTENSIVIST: THE HOSPITALIST REINVENTED

Physicians at CareMore, known as "Extensivists," comprehensively tailor the medical needs of every patient by practicing both inpatient and outpatient care at hospitals, skilled nursing facilities, and care clinics. Extensivists serve as a patient's continuous caregiver throughout hospital care and post-discharge follow-up. The ability to oversee and manage how patients are treated across multiple settings enables better outcomes than more fragmented approaches to care.

Ideal candidates to join CareMore will have achieved outstanding clinical skills through an internal medicine residency program, pursued advanced study in management, policy, or public health (MBA, MPP, or MPH), or have an established interest in quality improvement or care innovation. We seek candidates with a demonstrated interest in making the healthcare system better. As we are growing rapidly, we presently have positions in all of the states that we serve.

Visit www.caremore.com/About/Careers for more info and watch a video about what it's like being a CareMore Extensivist.

CareMore is a proud member of the Anthem family of companies. Anthem is ranked one of America's Most Admired Companies among health insurers by Fortune magazine, and is a 2013 Diversity Inc. magazine Top 50 Company for Diversity.
